This is absolute ridiculous attempt to deny me my Constitutional rights. I cannot believe the FCC would dare stop an attempt to create fair competition in the radio world. I listen to satellite radio and AM/FM radio about 50/50 now, but regardless of the outcome I will be switching to satellite radio almost exclusively now because I find disgusting that the NAB truly believes it knows what is the best way for me to receive my information and the steps they are willing to take to make sure I know this is what is best for me.
